

MEKUANNT ZELALEM TEMESGEN

FULL-STACK DEVELOPER

Dilla, Ethiopia • +251 913212259 • mekuze7@gmail.com • github.com/mekuze7

PROFESSIONAL SUMMARY

Results-driven software engineer and Computer Science student with a strong foundation in full-stack development and an active focus on building scalable web applications. Proficient in creating dynamic user experiences using the MERN stack (MongoDB, Express.js, React, Node.js), PHP, and Bootstrap, alongside robust enterprise logic in Java. Adept at handling the complete "CRUD" cycle, crafting responsive interfaces with Tailwind CSS, and designing modular systems for healthcare, event logistics, and interactive digital platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, PHP, HTML5, CSS3, SQL

Frontend: React.js, Vite, Tailwind CSS, Bootstrap, Responsive Design, CSS Animations

Backend: Node.js, Express.js, PHP (Server-side scripting), Java SE/EE

Databases: MongoDB, MySQL

Tools & DevOps: Git, GitHub, RESTful APIs, UI/UX Design Prototyping (Figma)

TECHNICAL PROJECTS

Hospital Management System (HMS) | React, PHP, Bootstrap, MySQL

- Architected an internal healthcare portal featuring distinct modules for secure patient registration, interactive dashboards, and appointment scheduling.
- Implemented a robust backend structure utilizing PHP to handle server-side validation, secure database connection logic, and smooth data transmission.
- Designed a responsive, user-friendly UI utilizing Bootstrap to ensure high scannability and accessibility for healthcare staff.

Personal Portfolio Website | Vite, React, Tailwind CSS

- Created a high-performance personal brand site featuring custom CSS animations and a mobile-first responsive layout.
- Structured the codebase cleanly using Vite for optimal hot-reloading and build speeds, incorporating Tailwind CSS for sleek typography.
- Optimized visual assets and layouts to emphasize technical projects and future career vision seamlessly.

Food Contract System | React, Node.js, Tailwind CSS, MongoDB

- Developed a digital management application designed to streamline institutional food supply contracts and vendor interactions.
- Implemented real-time data tracking pipelines and an intuitive dashboard layout to optimize complex procurement workflows.

Event Management System | Java

- Built a robust desktop-based registration and organization application engineered for high-throughput attendee tracking and automated scheduling.
- Developed modules for automated registration reporting and relational data views using native Java structures.

EDUCATION

B.Sc. in Computer Science – Dilla University, Ethiopia

Expected Graduation: 2027

- Current 3rd-Year Student.
- **Key Coursework & Focus:** Human-Computer Interaction (HCI), Artificial Intelligence & Agent Architectures, Advanced Database Systems, Wireless Communications & Telecommunications Architecture.
