SUMMARY

Results-driven Computer Science student and full-stack developer with hands-on experience building scalable web applications using the MERN stack, PHP, and Java. Combines strong software engineering fundamentals with growing expertise in offensive security, gained through cybersecurity training with Ethiopia's Information Network Security Agency (INSA). Skilled across the full development lifecycle, from responsive UI design to secure backend architecture, and now extending that foundation into vulnerability assessment and penetration testing to build and ship more secure systems.

PROJECT

Hospital Management System (HMS)

- Architected an internal healthcare portal featuring distinct modules for secure patient registration, interactive dashboards, and appointment scheduling.
- Implemented a robust backend structure utilizing PHP to handle server-side validation, secure database connection logic, and smooth data transmission.
- Designed a responsive, user-friendly UI utilizing Bootstrap to ensure high scannability and accessibility for healthcare staff.

Personal Portfolio Website

- Created a high-performance personal brand site featuring custom CSS animations and a mobile-first responsive layout.
- Structured the codebase cleanly using Vite for optimal hot-reloading and build speeds, incorporating Tailwind CSS for sleek typography.
- Optimized visual assets and layouts to emphasize technical projects and future career vision seamlessly.

Food Contract System

- Developed a digital management application designed to streamline institutional food supply contracts and vendor interactions.
- Implemented real-time data tracking pipelines and an intuitive dashboard layout to optimize complex procurement workflows.

Event Management System

github.com/mekuze7/event-management_system

- Built a robust desktop-based registration and organization application engineered for high-throughput attendee tracking and automated scheduling.
 - Developed modules for automated registration reporting and relational data views using native Java structures.
-

EDUCATION

B.Sc. Computer Science

Dilla University • Ethiopia • 2027

• Current 4th-Year Student

SKILLS

Languages: JavaScript (ES6+), Java, PHP, HTML5, CSS3, SQL

Frontend: React.js, Vite, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, PHP, Java SE/EE

Databases: MongoDB, MySQL

Tools: Git, GitHub, REST APIs,

Security: Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit, OWASP Top 10

Languages Spoken: Amharic, English
